## WHAT and HOW Does This Child See? Book and CD - 791000

“WHAT and HOW does this child see?” is a question asked each day by many professionals who work with children with vision impairment and blindness. Lea Hyvärinen, MD, PhD, FAAP, and Namita Jacob, PhD, wrote this book and CD with videos to answer that question.

This Book/CD package is a compilation of questions and answers from their many lectures in several countries. Drs. Hyvärinen and Jacob wrote this book especially for teachers of vision impaired children and early intervention and rehabilitation teams of all children with disabilities, as well as ophthalmologists, optometrists, neurologists, pediatricians, psychologists, and research workers in early intervention and special education.

### Chapters include:

- Planning and Conducting Visual Functioning Assessments
- Ocular Motor Functions
- Visual Acuity
- Contrast Sensitivity
- Visual Field
- Color Vision
- Motion Perception
- Visual Adaptation
- Visual Information Processing

### The Book/CD package includes:

- 238-page book
- CD with book chapters and additional material and resources, including videos of working with children

Also available as CD Only
